

Light Sanding & Recoating

Bona: **Restore**

Over time the top layer of your hardwood floor's protective surface is slowly removed by the wear and tear of daily living. To maintain the life of your floor it's important to periodically apply a new finish layer that restores its luster and protects its beauty.

A personal trainer for your lackluster floors.

- Removes dirt and grime
- Fills in surface scratches
- Restores sheen and luster of floor
- Creates a fresh protective wear layer

The **RESTORE** process

- 1** All dust, dirt and residue removed and floor is deep cleaned.
- 2** Floor is completely rinsed and prepped.
- 3** New finish is applied to refortify and protect the floor.
